

IRREVERSIBLY DAMAGED OR DESTROYED

Coton Orchard – a priority habitat

Madingley Hill

The West Fields

We are wholly in favour of better transport schemes.
But the GCP's C2C busway will not provide a good solution.

The off-road route:

- will be extremely ecologically destructive – felling 100s of trees and destroying Coton Orchard
- does not provide straightforward journeys to most key destinations
- is disproportionately expensive and carries significant financial risk
- was opposed by the majority of the public in all GCP consultations.

**There is a feasible, cost-effective alternative
that is better for the environment**
